

Erosion control blankets Geomat

Product specifications

Product description:

Stitched mulching and erosion control blankets Geomat are made from 100% coir fibres, straw or from mixtures of coir fibres and straw. Blankets are reinforced with jute or PP netting. Blankets provide immediate protection against soil erosion, protect the seed and help to restore vegetation. They create a suitable microclimate for optimal growth conditions.

- ① ideal for all inclinations of natural slopes
- ② longevity 12-60 months
- ③ variants with jute netting are 100% natural (without plastics)

Function:

Certificates:

Name	Material	Longevity [months]	Weight [g/m ²]	Thickness [mm]	width [m]	Roll		
						length [m]	area [m ²]	weight [kg]
